

2011 Feng Shui Certification Program

(Module One of the 2011-2012 Personal Mastery Program)

Feng shui is the idea of living in harmony and balance with our environment and dates back over 7000 years. It is the study of energy (Chi) and how it's circulation affects people. The circulation of this invisible energy can be blocked or distorted by our environment, thus creating negative energy. Feng Shui tips, products, and information help unblock Chi and provide good fortune and harmony in your home, office or business.
